SIX AI COLLEAGUES, BUILT INTO YOUR CRM

Meet the team that never clocks off.

Centaur has six AI agents built in. Each has one job and does it the same careful way every time. They work from your own mailbox, calendar and CRM data, and they answer to you.

The Opener

OUTREACH AGENT

First to reply. Friendly, curious and never pushy.

- Answers every new inquiry within minutes, in the prospect's own email thread.
- Offers real free times from the rep's calendar and books the meeting.
- Follows up twice if they go quiet, then hands back to the rep.
- Asks one or two qualifying questions at a time, using your method: BANT, MEDDPIC, SPIN and more.
- Turns the lead into an account, contact and deal, with everything it learned.

ON SHIFT

Around the clock. Meeting times only inside the rep's working hours.

NEVER

Ignores an opt-out, answers an out-of-office, or talks over a rep who has stepped in.

The Analyst

OPPORTUNITY AGENT

Quiet. Reads everything. Misses nothing.

- Reads every customer email and rep call note on an open deal.
- Fills in budget, authority, need and timeline as they come up.
- Spots competitors and flags risks: a budget freeze, a rival, a champion leaving.
- Keeps a running "where this deal stands" summary.
- Drafts a reply for the owner when the customer asks for something.

ON SHIFT

On every open deal, in the background.

NEVER

Emails the customer itself, guesses which deal, or overwrites your rep.

The Briefer

MEETING BRIEF AGENT

Up before you are, with a one-page brief.

- Every morning, prepares a brief for each deal with a meeting that day.
- Deal summary: age, stage, value and the latest activity.
- Company research from the live web.
- Talking points, plus the risks and competitors The Analyst has flagged.
- Delivered on the deal, on your Today page and in your Slack digest.

ON SHIFT

Every morning, before the first meeting.

NEVER

Guesses. If there is little public information, it says so.

The Scribe

AI CALL NOTES FOR TEAMS

Listens to the call so you can stay in it.

- After a recorded Teams call, writes the overview, key points and agreed next steps.
- Puts the note on the right contact and deal.
- Updates the deal with what was agreed: value, close date, quantity.
- Flags anyone on the call who isn't in the CRM yet.

ON SHIFT
After every transcribed Teams call.

NEVER
Changes a deal it can't be sure the call was about.

The Copywriter

AI-DRAFTED SEQUENCES

A personal email for every name on the list.

- You set the intent for each step: "introduce the product", "a gentle nudge".
- It writes a version for each person, using their role, company and industry.
- A rep approves every email before it goes.
- Anyone who replies drops out of the sequence at once.

ON SHIFT
Whenever a sequence step is due.

NEVER
Invents facts about a person, or sends without a rep's approval.

The Co-pilot

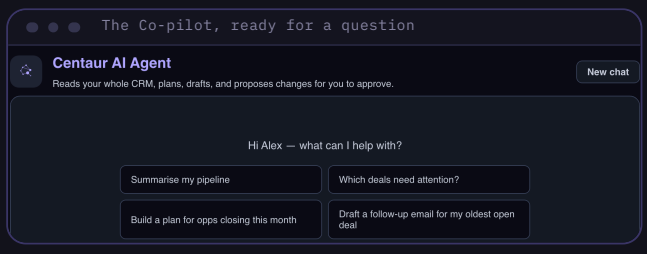

CENTAUR AI ASSISTANT

Ask it anything. It asks before it changes anything.

- Answers questions about your pipeline in plain English: "Which of my deals close this month?"
- Logs calls, emails and tasks, and updates a deal's stage, value or close date.
- Builds a marketing list from a description.

ON SHIFT
Whenever you open the chat.

NEVER
Changes a record until you click Apply.

Real product screens from a demo workspace with fictional data.

YOU ARE THE BOSS

They do the work. You make the calls.

Draft first

Out of the box, the agents draft and a person approves. Let The Opener send on its own only when you are ready.

Guardrails

Choose what they must never commit to: prices, discounts, legal terms, roadmap dates.

Nothing hidden

Every action is logged in AI Activity. Anything needing a decision waits there for you.

One pause switch

Stop every agent at once. Your team's own entries are never overwritten.

Put the team to work on your pipeline.

The agents run on your own AI key, at cost, with no markup. The beta program is open now, with a lifetime discount for teams that join early.
